

**Name:** Childbharathi one

**Child ID:**

**Date of Testing:** 10/09/2024

**Chronological Age:** 2 years, 6 months, 8 days

**Gender:** Male

**Location:** product

**Date of Birth:** 04/01/2022

**Label:** all lables

The *Battelle® Developmental Inventory, Third Edition™ (BDI-3™)* is an early childhood instrument based on the concept of developmental milestones. As a child develops, he or she typically attains critical skills and behaviors sequentially, from simple to complex. The BDI-3 measures a child's progress along this developmental continuum in global domains and discrete skill sets in the following areas: Adaptive, Social-Emotional, Communication, Motor, and Cognitive.

Receptive Communication	9	1	<1	– 3.00

## Score Descriptors

---

**Raw Score (RS)** - A raw score is the summation of the points given for each item within a subdomain or area.

**SS - Standard Score or Scale Score** - Domain Standard Scores (SS), also called Developmental Quotients (DQ), have a mean of 100 and standard deviation of 15. A Domain SS of 85 falls at the 16th percentile, 100 at the 50th, and a SS of 115 falls at the 84th percentile. Subdomain scaled scores have a mean of 10 and standard deviation of 3. A scaled score of 7 falls at the 16th percentile, a scaled score of 10 falls at the 50th, and a scaled score of 13 falls at the 84th percentile.

**PR - Percentile Rank** scores reflect a child's relative position within the normative sample for his or her age group.

**Z-Score** - A Z-Score is a score that is measured in terms of standard deviations from the average, or mean, and is expressed as 0, positive numbers, or negative numbers. A Z-score of 0 falls at the mean.
